Well Known Park City Property | SHAWMUT MILL CLOSED DOWN. Tied Up.

ADJOINS THE ANCHOR

B. S. KIMBALL AND ASSOCIATES TO OPEN IT UP.

Word comes from Park City that B. S. Kimball and others have secured a lease and bond from the heirs of the iate Smith Ehenger on the group of eight patented claims adjoining the Anchor on the southwest and beginning at a point only 700 or 800 feet from the Anchor's 1,600-foot shaft. The ground is known to the old-timers of the camp as the Rosebud group, and many were the chances Ehenger had to sell out at a good price. Like the majority of oid prospectors, however, he pegged along and wore his life out in the funnels along and it is understood construction work is likely in the tunnels, always demanding a

but that strong financial talent is in-terested is to be presumed, as the ground is unquestionably very valu-able. The claims reach clear across the divide into what is known as Bo-manza flat and is almost entirely sur-rounded by Anchor territory.

HONORINE STEAMED UP.

Sinking Began In the Shaft Yesterday.

Manager C. H. Scheu of the Honor-Manager C. H. Scheu of the Honorine stated yesterday that advices from Superintendent Radgatz were to the effect that the new steam plant was in operation, the shaft was being freed of water, and that sinking would be resumed again yesterday.

Satisfactory.

Standish & Jimpson have formally turned over their lease of the R. G. W. tramway of Bingham. The price is said to have been \$15,000. The length of the road, from depot to upper terminus to be established for the present, sumed again yesterday.

far from the power house and under similar conditions as those prevailing at the Honorine, where it is being conveyed nearly 5,000 feet underground in ham C. & G. north tunnel. Meanwhile perform its function. In this case five-inch pipe, incased in a thick covering of asbestos and painted canvas, is employed, and the start promises that most successful results will be accomplished. The old Honorine will, therefore, be made to give up the secrets which have so long been buried beneath the road construction will not reverse. of asbestos and painted canvas, is employed, and the start promises that most successful results will be accomplished. The old Honorine will, therefore, be made to give up the secrets which have so long been buried beneath the water level, and will soon be again the secret mineral prospections of the secret mineral prospective forms the secret mineral prospective forms and the secret mineral prospective counted among the great mineral pro-ducers of the state.

One good result has come from the

enforced suspension of operations below the water level pending the installation of the great steam plant, and that has been the uncovering of new ore bodies on the tunnel level. The strike made a few weeks ago promises to develop into something really big, and as there is 3,000 feet of virgin ground in front of the find, Manager Scheu says the chances for opening a bonanza above thances for opening a bonanza above Knutsford. the water line are by no means impos-

bond on the old-time bonanza have spent a fortune in getting ready to open it up, and their move deserves a great reward. That they will get it no one acquainted with the ground doubts for a moment.

YANKEE CON. AFFAIRS.

Plan of Retrenchment After Settling With May Day.

After issuing a check for \$3,000 to the

May Day company, the directors of the Yankee Consolidated at once buckled mining fraternity by building a plant down to business and made arrange- and establishing headquarters in this ments to cut the expense account down to the minimum until such time as the ore chute developed on the May Day side of the line is opened up in undisputed territory on the Yankee side.

Speaking of the matter yesterday a director of the company said the \$3,000 payment to the May Day did not leave the company brike by any means and the scattlength from the secretary of state yesterday is sued a certificate of incorporation to the company broke by any means and he was more than confident that the ore chute would be opened in their own ground without having to resort to assessments. Manager Egan, he said, had proffered his services free until such time as the mine was again making money and his offer had been accepted. The foreman's salary had been reduced and the working force at the mine cut down to the necessary three reduced and the working force at the mine cut down to the necessary three shifts which had been put on to run the sixty feet necessary to cut the chute from another point in the tunnel. In twenty days, at the outside, the gentleman said, the Yankee would again be sending out ore and with nearly 600 feet of stoping ground above the tunnel level he had no doubt that dividend money would be forthcoming.

dividend money would be forthcoming in the near future. OFF FOR GUNNISON ISLAND.

Parties Leave For the Guano Beds Today.

George Frary and George Payne, the well known lake navigators, came down from Syracuse yesterday and last night were accompanied back by Albert New York brokers', \$4.00; from Syracuse yesterday and last night Richter, manager of the Utah Guano company, who, it is understood, will go

Mining Notes.

Manager by the count with the boys and inaugurate work on the property. Mr. Frary says the lake has risen four inches during the past month and he looks to see the level of the lake higher next season than it was during the past.

He also reports that great preparations are being made by the Southern Pacific to begin work on the lake cut-off line from Ogden to Lucin, and by the first of the year he expects to see an army of men, with pile drivers and steam shovels by the dozen, at work on the line. The water and land work, he learns, is to begin simultaneously, when grading from Ogden to the iske shore, making the big cut through the south end of Promonitory, and pile driving will all be under way.

With the cut-off built, the guann beds of Gunnison island will become very valuable, as the road, if it does not touch the island, will run so close that the material can be loaded on the cars at very little cost.

Manager Egan was at the Yankee yesterday.

Secretary A. L. Jacobs will visit the Bunker Hill today.

Manager J. E. Bamberger of the Daly-West is expected home again on Thursday next.

Three cars of concentrates from the Horn Silver mill at Frisco reached the market yesterday.

The Centennial-Eureka company made settlement for ten cars of silver-gold ore yesterday.

Senator Clark's Ophir Hill property contributed fifteen cars of concentrates to the ore market yesterday.

C. B. Markland goes out to the No-you-Don't at Stockton tomorrow, when a drift will be started south on the 300 level.

C. B. Markland goes out to the No-you-Don't at Stockton tomorrow, when a drift will be started south on the 300 level.

The Taylor & Brunton sampler was yesterday in receipt of fifteen cars of concentrates to an article headed Brawny Scots' Diet, many family, with most gratifying results.

HIGHLAND BOY TRAMWAY.

Its Enlargement and Change of Ter-

minals Nearly Completed. Manager H. F. Poland of the High-land Boy, says the work of changing and enlarging the terminals of the mine's aerial tramway is progressing rapidly and the next two weeks will set the task completed. When the final shifting of the cables occurs a three or four days' shut down, of the system will be necessary and in order that the tonnage going through the smelter shall not be curtailed, the tram will be made to handle a larger amount of ore that the new bins may be filled to meet the draft during the time which the buckets are idle.

At the smelter splendid headway is being made and Mr. Poland says there is no longer any doubt that the new yill go into com-Manager H. F. Poland of the High-

mission on schedule time. From the first of January the Highland Boy will make things hum and gladden the hearts of the stockholders with earn-

Concert and Ball.

(Bingham Bulletin.) Today two carloads of Silver Shield ncentrates from Rogers' mill will be shipped, following three cars of crude that went from the mine this week.

Last Tuesday five feet of fine lead ore was encountered in a drift off from the upper crosscut tunnei of Midland, which cut ledge at 600 feet. Yesterday bout twenty-five tons of ore had been

broken.

It is understood in the city that the Frisco-Morning Star consolidation, referred to in these columns last month, has been duly perfected and that under extension of big Highland Boy vein is

understood construction work is likely

in the tunnels, always demanding a greater figure than anybody was willing to give.

It has been known for several weeks that representatives of the estate have been out from the east, but it did not develop till yesterday that a deal had been closed. Mr. Kimball is now on the ground and with a supply of provisions, tools, etc., is inaugurating a winter campaign of development work, which it is understood is to be presocuted in the Rosebud tunnel, the mouth of which is not far from the Anchor hoisting works.

The cld tunnel of Alamo group having been cleaned out and timbered, further driving has begin under the direction of John T. Hodson. The tunnel had formerly been run about 275 feet, on vein, and was considerably cayed near face. Latter is full with in assays 12 to 20 per cent copper, balance averaging 4 to 6 per cent. It is the intention to extend tunnel some distance further and then sink. Alamo ore is of the same character as that of Highland Boy at similar depth.

The Shawmut company has shut down its mill, and the wheels will not turn again until steady power is assured by the Jordan Narrows works or

sured by the Jordan Narrows works or a steam plant has replaced the electric machines, says the Bingham Bulletin, E. F. Barnes of the company, here from Boston, left Salt Lake last evening for the east and it is probable that before his departure a definite under-standing was reached which will result in the ordering of a steam plant. A force of twenty-six men is now employed on development work in the and results are reported very

sumed again yesterday.

Probably at no mine in Utah or anywhere else in the west is steam being made to operate pumps and hoist so (ultimately to be extended) to a point (ultimately to be extended) to a point of the present (ultimately to be extended).

MORE OF THE "DRY" PROCESS. President of the Company Joins the Forces Now Here.

A. J. Harrell, president of the Crown Milling company, the company owning cess of ore concentration, came in from Palo Alta, Cal., yesterday and joined Messrs. Doe and Wood at the

As previously stated, Manager L. B. Doe has been looking over the field with a view to putting in a plant here for demonstrative purposes and that President Harrell has been called on to the ground goes to show that the proposition has been considered favorably by the manager.

During Mr. Wood's stay he has met and explained the principles of the new

and explained the principles of the new dry method to a great many mining men, and while some of them are skeptical, they are all willing to be convinced that the method is all that is claimed for it. There is now every indication that the company will decide to gratify the curiosity of the entire J. Ajax, Blacktoot, Ida.; T. Fowler, Og.

Ben Harries Seeks to Recover \$100 From A. L. Kimball,

The damage suit for malpractic which was begun by Deputy Sheriff Ben Harries against Veterinary Sur expressed themselves as highly pleased with Mr. Roney's work.

It was decided to deaden the floors of the new buildings in order to kill the sound that is very annoying and interferes with the school work. Experiments in regard to this will be tried in three different rooms with three different methods of deadening, and the large of the court with a diagram of the nary explain by the diagram of the nary explain the nary explains to the nary explains the nary explains to the nary explains the na

> Dr. Kendall was placed on the stand horse when he was called to attend it. He declared that the condition of the horse demanded the treatment which

WEAK NERVES. There is not a case of Nervous Weakness in the

world today (no matter what the cause or of how long standing) that the use of Lincoln Sexual Pills according to directions, which are simple and easy to follow will fail to permanently cure. Why do you remain weak when Lincoln Sexual Pills will make you strong?
